BUILDING and REMODELING

Automatic Heating Gives Even Temperatures When Weather Proves Variable

A great many families have difficulty at this time of year in maintaining a comfortable even heat in their homes due to sudden variations in the weather. Cold snaps mean low indoor temperatures, and sudden rises in temperature find these householders with furnaces giving off twice as much heat as required.

One of the outstanding contributions towards greater comfort and convenience in the modern home is the development of automatic heating. By the addition of a few simple devices, so easily installed, householders can be relieved of practically all the labour and worry of providing comfortable even heat for their families throughout the long winter months.

Two of three decades are the thermostat and the automatic clock. The former is a temperature-sensitive instrument, resembling a thermometer, by means of which the household regulates the temperature and the resulting variation automatically maintains the heating of the house at the temperature level. The instant the room temperature falls below the degree set on the dial, the clock starts turning the boiler, and so on, as there is a fall in the temperature, the automatic device will keep the fire going.

NIGHT TEMPERATURE
If the heat is desired for sleeping hours, the thermostat may be set at night for 40 or 45 degrees and, as the clock starts turning, the automatic device will keep the fire going at the higher temperature at an early hour in the morning without requiring the man of the house to get up early to do it.

The latest development in automatic heating-outdoor temperature control is an outstanding achievement. Under ordinary circumstances, when the thermostat inside is set at the desired temperature, the boiler will not increase the heat until the temperature inside becomes lower.

But with outdoor temperature control, when the temperature starts to take a drop, the thermostat sends word to a fine of heat, so that the house is kept warm.

MASSEY SEES TIDE TURNING FOR BRITAIN

LONDON, April 3.—(CP)—Hon. Vincent Massey, Canadian high commissioner in London, said in a recorded speech broadcast Friday night over a national network of the Canadian Broadcasting Corporation that "We have full cause to feel that the tide of events is turning in our favor."

"Our confidence is based not only on the knowledge we have gained during the dark months after Dunkirk of the staff of which the

British character is built," he said. "The high commissioner recorded the address on behalf of the Canadian war service fund, which was conducted by six welfare agencies to provide benefits for the armed forces."

"Once again, British armies, British fleets and the British air force are on the offensive," he said. "We have shown that Britain can take it. The world now has learned that Britain can strike back."

DAIRY GROUPS ASK MINIMUM BUTTER PRICE

Separate Recommendations Made To Dairy Pro- ducts Board

OTTAWA, April 5.—(CP)—Separate recommendations that the minimum price of butter be fixed at 31 and 34 cents a pound, based Montreal, were submitted to the Dairy Products Board Friday at the close of a two-day meeting of representatives from the dairy industry and producers' organizations.

Aside from the variance in minimum price suggested the two submissions were practically identical. The 31-cent price recommendation was made by a group of dairy men's organizations based at the National Dairy Council of Canada. The 34-cent price was suggested by the Dairy Farmers' Federation whose delegates attended the two-day conference here but decided to make their own submission.

PRICE OF CHEESE

Both submissions asked that provision be made for increasing the price of cheese to 18 cents a pound at Montreal, plus the existing quantity discounts.

The group headed by the National Dairy Council also suggested to the board that consideration be given to establishing regulations to prevent cream from being skimmed during the season in which a cheese factory operates from farms who send their milk to the cheese factory in 1941, provided that cheese factory facilities are available.

It urged that factories equipped to manufacture both butter and cheese make cheese only. Both submissions recommended that the Dominion government should be prepared to provide an alternative market for butter at the minimum price should the trade during the flush production season be restricted to purchase all the butter offered on the market.

DELAY DECISION

The present fixed maximum price of butter is 35 cents a pound, based Montreal and the dairy products board has been authorized to fix a minimum price.

Dairy products board officials said it was not likely they could give a decision on minimum price recommendations immediately.

The brief presented to the board said cheese production in particular should be such in 1941 that Canada could supply Britain's requirements first and still maintain sufficient volume for the domestic market.

Under the cheese agreement now in effect with the United Kingdom Canada agrees to supply 112,000,000 pounds of cheese during the coming year. The price is 34 cents at Montreal.

Price Pegging Announced For Farm Products

WASHINGTON, April 5.—(CP)—The agriculture department announced today a program of price pegging for pork, dairy and poultry products in what was called a move to assure production of adequate supplies for the United States. Great Britain and other nations requiring "agreements."

Under this program, the department will step into the commodity markets to buy these products in quantities as to peg prices at approximately the prevailing levels. "Chicago basis."

Here \$100 a hundred pounds; butter, 31 cents a pound; chickens 15 cents a pound and eggs 22 cents a dozen.

The department said it hoped the price-pegging would encourage more expansion of production considerably.

Relations Of Confederation Need Revision

REGINA, April 5.—(CP)—Premier Patterson in the Saskatchewan legislature yesterday said that in the interests of all the people of Canada "it was necessary that relations between the provinces and the Dominion should be revised in the light of experience of the last 40 years."

He made the statement while speaking on a resolution respecting the Senate reform and the conference held at Ottawa last January to consider it.

"It was a great pity the report had not been considered at that conference," he said. "It was not so much a fault of the conference. Others will have to bear that responsibility and time will decide whether they were right or wrong."

BALKANS...The Word Means Mountains

BETWEEN 1:50 a.m. and 2:01 a.m. on March 27 the white picture of power and politics in the Balkans changed.

At 1:50 Yugoslavia was a signed member of the Axis; at 2 a.m. Yugoslavia's anti-air army took power.

From a military standpoint, Yugoslavia has great power and serious weakness.

Brotherly strength lies in (1) strategic terrain; (2) a multiplicity of rivers as long as any in Europe; (3) a fierce nationalism in spirit; (4) her ability to throw a mighty punch into any assembly-lined Axis thrust south and east at any time; (5) Italy's vulnerability in Albania.

Her weakness: (1) invading, invading northern approaches; (2) lack of an adequate air force; (3) no adequate navy; (4) dependence on outside sources for munitions.

Except on the north, Yugoslavia is mountainous. South and west Yugoslavia has mountains. In either way, they have South and west Yugoslavia as adequate refuge.

Mechanized forces can only stick to narrow valleys.

In the Balkan-Nub-Salonia triangle, Yugoslavia has within her borders command of the major routes of travel and supply in the Balkans. Most of World War I Balkan fighting was for control of this triangle.

Bulgarian-German Axis leaders viewed the ridge heights for starting points, then Yugoslavia put the heights in better revision after the war, has the tremendous advantage now.

Importance of the triangle: control of the main Balkan routes cannot be overestimated.

The Yugoslavs proved themselves as soldiers in the First World War. They fought some of the most gallant and most desperate battles of the war. There are a million of them ready to go now.

That Yugoslav army cannot be a deterrent to any push on the Balkans until the matter is certain of its intentions.
